Volunteered for **INOI Workshop, 2016** at IIITD.

Participated in **Google Code-in 2015**.

PROJECTS

Search Suggestions

This was made for an internship task. It uses basic PHP/MySQL code and a very simple Front-end. The search box displays suggestions based on the keywords entered.

https://github.com/shubhangsati/search_suggestions

Calendar App (Team of 2)

A simple calendar app that allows you to link your google calendar with it, add/delete events etc. The backend is written in Flask. The frontend is only HTML/CSS and some jQuery.

<https://github.com/shubhang16198/CalendarApp>

shubhangsati.me

This website was made as a project assignment for a course in first semester.
